A Public Hearing concerning the FY2018 Title V Permit Fee, to be set by the Commission, was held on December 21, 2016. No comments were received. The Oil and Gas Board approved amendments and revisions to its Statewide Rule 68 on November 16, 2016, related to Disposal of Naturally Occurring Radioactive Materials (NORM) Associated with the Exploration and Production of Oil and Gas as discussed in the attached December 20, 2016, correspondence from the Oil and Gas Board for your review. By statute and through case law, the amendments and revisions to the Rule 68 Disposal regulations must be approved by the Commission. Staff has previously briefed the Commission on this matter. The staff of the Oil and Gas Board has coordinated with staff of MDEQ on the amendments and revisions to Rule 68. Attached for your review are a rationale and supplemental rationale prepared by MDEQ staff related to the amendments and revisions to Oil and Gas Rule 68. Representatives of the Oil and Gas Board will be present to answer questions. MDEQ staff recommends the Commission approve the amendments and revisions to Oil and Gas Board Rule 68.

5. Commission Designated Hearing Officer

Pursuant to the Miss. Code Ann. Sections 49-17-31 and 49-17-33, MDEQ recommends that Doug Levanway, an attorney with Wise Carter in Jackson, be added and designated by the Commission to serve as hearing officer in future Commission evidentiary hearings.

7. Commission Approval of Environmental Covenant Accelerated Companies, LLC Facility – Laurel, MS

Pursuant to the Commission's delegation regulations (11 Miss. Admin. Code Pt. 1, R.1.1.Y.), the Executive Director of MDEQ approved the Environmental Covenant between the Commission and Accelerated Companies, LLC regarding the remediation of property located at 3625 Industrial Boulevard, Laurel, MS. The accompanying Restrictive Use Agreed Order was also approved by the Executive Director. Environmental Site Assessments revealed a release of Diesel Range Petroleum compounds impacting shallow soils beneath the footprint of the building on-site and a release of Cadmium impacting groundwater in one shallow well at concentrations in excess of Target Remediation Goals (TRGs). Therefore, remediation of the site is necessary. The staff of the MDEQ evaluated the proposed Environmental Covenant and believes that, with the conditions and restrictions

contained within; the site will be in compliance with applicable State laws and standards and will be protective of the public health and the environment. This agenda item is for reporting purposes only.
